DIMENSIONE: Cyber Intimate Private Violence (CIPV)

Cyber Intimate Private Violence (CIPV) indica una forma di violenza digitale che avviene all'interno di relazioni intime o private.

Può manifestarsi in vari modi, ad esempio:

- diffusione o minaccia di diffusione di immagini intime senza consenso (revenge porn)
- controllo delle comunicazioni (messaggi, email, social)
- molestie e intimidazioni tramite chat o social media

Toxicity Sentinel

- Grafico di tossicità
- Livello di tossicità
- Potenziali escalation (!)
- Messaggi contrassegnati con la tipologia di tossicità
- Analisi dei propri messaggi (!)

Low Risk

Toxicity Trend Over Time

Shows running average toxicity (red line) and individual message toxicity levels

Detected Abuse Patterns

No clear abuse patterns detected in current conversation

Personalized Safety Advice

Based on the patterns detected in your conversation:

 Current toxicity level: 11% - continue monitoring for any developing patterns

 Trust your feelings - even if toxicity levels are low, pay attention to how interactions make you feel

Escalation Warning - Potential Future Messages

⚠️ "You never listen to what I'm saying"

⚠️ "You're being too emotional about this"

⚠️ "Why can't you just understand me?"

⚠️ **Warning:** If you start seeing messages similar to these predictions, the situation is escalating. Consider reaching out for help immediately.
