

Sonet-Bull Platform: Crowdsourcing and Peer-Learning against Bullying

Sonet-Bull platform is online! A training and networking resource for the school community and all actors involved in preventing and counting bullying.

Sonet-Bull platform is online! A training and networking recourse for the school community and all actors involved in preventing and counting bullying.

Sonet-Bull platform was conceived to provide school staff and families with a rich repository of didactic material on bullying amongst young men and women to help them understand about the phenomenon, an environment to discuss and share experiences amongst young men and women and a network of actors involved in the phenomenon capable of developing collaborative prevention strategies to contrast the phenomenon, especially at school.

Register on our platform and share cases and episodes of bullying. Help us start a debate on this difficult phenomenon.

The development of the network on the [platform](http://www.sonetbull.eu) goes hand in hand with an educational path for school staff, parents, educators and psychologists in the countries involved in the Sonet-Bull project funded by the Erasmus+ Programme. The training are organised by the partners Hellenic Open University(HOU), Greece; Initiatives for efficient training (INFOREF), Belgium; Computer Technology Institute and Press (CTI), Greece; [Fondazione Mondo Digitale \(FMD\)](#), Italy; Dublin City University, Ireland
